

IL-1040-ES Estimated Income Tax Payments for Individuals 2005

Am I required to make estimated income tax payments?

You must make estimated income tax payments if you reasonably expect your 2005 tax liability to exceed \$500 after subtracting your Illinois withholding and tax credits for

- income tax paid to other states,
- Illinois Property Tax paid,
- education expenses,
- the Earned Income Credit, and
- Schedule 1299-C, Income Tax Subtractions and Credits (for individuals).

You most likely will need to make estimated payments if your income is either fully or partially exempt from Illinois withholding.

You should complete the Estimated Tax Worksheet on the next page to figure your estimated tax and to determine if you are required to make estimated tax payments. If you plan to file a joint income tax return, you must figure your estimated tax on the basis of your joint income.

If you determine that you are required to make estimated payments, you should pay 100 percent of the tax. If your income changes during the year, you should refigure your worksheet and complete the amended worksheet to determine if you should change the amount of estimated payments or start

making estimated payments.

Note → If you do not receive your income evenly throughout the year, see Form IL-2210, Computation of Penalties for Individuals, for further details on annualizing your income.

When are my payments due?

Your first estimated payment is due by April 15, 2005. You may either pay all of your estimated tax at that time or pay your estimated tax in four equal installments that are due on April 15, 2005; June 15, 2005; September 15, 2005; and January 17, 2006.

If you must begin making estimated payments in midyear, your payment dates depend on when the change in liability occurs.

If the change occurs

- after April 1 but before June 2, you must make payments on June 15, September 15, and January 17, paying one-third of the tax each time.
- after June 1 but before September 2, you must make payments on September 15 and January 17, paying one-half of the tax each time.
- after September 1, you must make your payment on January 17, paying all the tax.

Note → If you file on a fiscal-year basis, please adjust all the due dates to corre-

spond to your tax year.

What if I am a farmer?

Farmers are not required to make estimated payments. We consider you a farmer if at least two-thirds of your total federal gross income is from farming.

What if I do not make my payments?

You may be assessed a **late-payment penalty** if you do not pay the required estimated payments on time. We will apply each payment to the earliest due date until that liability is paid, unless you provide specific instructions to apply it to another period. However, if you pay at least 90 percent of this year's tax or at least 100 percent of last year's tax in four equal timely installments, you may not be subject to this penalty.

In addition, a **bad check penalty** will be assessed if your remittance is not honored by your financial institution. For more information about penalties and interest, see Publication 103, Uniform Penalties and Interest.
